- Ability to report on statistics such as the number of accounts and account balances

Benefits

The Financial Services Library allows for retail financial products sold by financial institutions to be priced, projected and valued. The library has great flexibility and the products can run stochastically and linked to an index of bank base rates. Mortgages prepayment rates can be customized to use either in house or third party prepayment models.

The library contains a wealth of standard features and is extremely flexible and allows easy customisation for any company specific features.

Summary

The Financial Services Library provides a comprehensive, extensive, easily customisable purpose-built actuarial library for pricing and projection of financial services products.

About FIS' Prophet solution

The Prophet solution from FIS™ is a leading enterprise-wide actuarial modeling system that helps insurance and financial services companies meet reporting responsibilities, improve risk management, and develop more profitable products faster. Prophet uses customizable actuarial libraries for all major product types, including regional variations. It provides the transparency, performance and control required by today's actuaries and risk managers through integrated financial modeling and data management capabilities. Prophet is used by more than 9,000 users at over 730 customer sites in more than 65 countries.
